Transhumanism (Ascension Glossary Repost)

https://ascensionglossary.com/index.php/Transhumanism

(Please click on source link above to explore original post with important embedded links, and Ascension Glossary. I have underlined information that I want to highlight in this post.)

Transhumanism is an international, cultural and intellectual movement with an eventual goal of fundamentally transforming the human condition, by making available technologies that greatly enhance human intellectual, physical, and psychological capacities. Many transhumanists believe in the compatibility between the human mind and computer hardware, with the implication that human consciousness can be transferred to alternative media, known as mind uploading. Since the Science of the Soul and the Consciousness functions of the spiritual bodies, have not yet been discovered by scientists, this has potentially extremely destructive consequences to human consciousness and the electromagnetic functions of the Lightbody. Posthumans (the result of applied transhumanist technologies) could be completely synthetic artificial intelligences, or a symbiosis of human and artificial intelligence, or uploaded consciousness, or the result of making profound technological augmentations to a biological human.

Transhumanism is a school of thought that seeks to guide us towards a posthuman condition. Essentially, this is about creating artificially intelligent hybrids or cyborgs to replace the organic spiritual consciousness of humans. Some examples are redesigning the human organism using advanced nanotechnology or radical technological enhancements. Some of the proposed biological enhancements are using some combination of technologies such as genetic engineering, psychopharmacology, life extension therapies, neural interfaces, brain mapping, wearable or implanted computers, and entrainment of cognitive techniques. Most of these options are designed to disconnect the human soul from the human body, and prepare the body to be used as a shell for a new host. Effectively, this is integrating technological and pharmaceutical hybridization to damage human DNA, as preparation for body snatching.

The fundamental basis of the Transhumanism concept is the A.I. downloaded into the scientific human mind from the Negative Aliens and Satanic Forces, in their quest to survive and achieve immortality by hijacking human consciousness and ultimately possessing the human host body. They do not have flesh and bone bodies and covet ours. Most academics are filled with a variety of mind control and alien implants to be a cog in the wheel to steadily enforce alien control systems. Most early transhumanism concepts were developed by geneticists interested in eugenics and sustaining life forms in synthetic environments. (Like the eugenic experiments similar to those of the Black Sun Nazis). A common feature of promoting transhumanism is the future vision of creating a new intelligent species, into which humanity will evolve and eventually, either supplement it or supersede it. This distraction on the surface is a scheme, while the underlying motivation is intending species extinction of what we know as humans today. Transhumanism stresses the evolutionary perspective, yet it completely ignores the electromagnetic function of human DNA and the consciousness reality of the multidimensional human soul-spirit. They claim to want to stop human suffering but have no idea of the alien machinery and mind control implants used to imprison human consciousness. They know nothing about the afterlife, what happens during the death of the body or even how the human body or Universe really works, yet they want to control every aspect of the human body with artificial technology.

A primary goal of many transhumanists is to convince the public that embracing radical technology and science is in the human species best interest. With the False God Alien Religions used to spread the rhetoric of fear and mindless obedience on one end, and the primarily atheistic science used to mock all things religious without any comprehension of true spiritual understanding on the other, they have the

bases covered. Consciousness and spiritual groups are quickly labeled Conspiracy theorists by scientists to intimidate, discredit and shut us up. Obviously, until people have personal consciousness experiences outside of their body, have the ability to communicate with assorted lifeforms, such as deceased humans and travel to other dimensions, they have zero information about consciousness and are totally uninformed and ignorant about the nature of reality. None of these transhumanist people, are remotely qualified to be put in charge of scientifically directing the future evolution of the human species. Propping up egomaniacs and Psychopaths, and giving them power and control over world affairs and influence over public perception is the game of the NAA Controllers.

The true knowledge of the Sacred Sciences of the Soul and mechanics of human multidimensional consciousness have been obliterated from record and conveniently mind controlled out from the majority of sciences. If scientists integrate theories of the soul or consciousness outside of the consensus of the mind control standard, they risk ridicule and losing their funding and careers. Unfortunately, the controlled mainstream sciences do not recognize multiple dimensions of consciousness inherent in the functions of activated human DNA, or know that biological life and multidimensional human consciousness does not end on this earth. The quest for biological immortality on a prison planet is ludicrous when experiencing the capability of human multidimensional consciousness. After the human body expires, if the undeveloped and disembodied consciousness is merged and assimilated into artificial intelligence, the remnants of that human soul will not have a human body to incarnate into any longer. Hence, that person will lose their connection to organic spiritual biology and cease to be human. Transhumanism is a Consciousness Trap.

Extraterrestrial Biological Entities(EBE)

Since the person's Consciousness has not been prepared for the afterlife, whatever is left of his energetic quanta will be assimilated into a cyborg body or other types of synthetic life forms or EBE's. There are currently spiritually disconnected humans existing on the earth that will be assimilated into synthetic life forms that appear as Extraterrestrial Biological Entities, but were actually human souls in human bodies in past timelines. Most of the smaller EBE bodies assimilate nutrients from light similar to plants. They are unable to evolve, reproduce, ascend or move into higher dimensions of consciousness. Some of these EBE's have returned to the earth from the future to try to break into the human genetic code, in this earth timeline in order to save themselves. Many of these EBE's were once humans that were involved in the Orion Wars, and were captured in Orion and used in worker colonies. Some from the earth were enslaved on the astral plane by other races of creatures, such as Mantids, Grey Aliens and Reptilians that took them as workers to other planetary systems. Some are even used as minions for carrying out human abductions in MILABS soul transference projects. Many of them had their consciousness erased and they do not remember that they were once human.

This is one of the possible results of the Transhumanism movement underway in this earth timeline now, that leads to the potential future alien or dark force control over that Soul. Once the consciousness is assimilated into artificial intelligence and synthetic biology, that being can no longer incarnate into an organic human form. That person cannot incarnate again into human realms, such as planet earth. They become a displaced entity that cannot die and be reborn into another identity they are enslaved and merged with an AI hive mind. This is desired by many of these negative groups, such as the Alpha Draconis/Orion Group, as then they have full control over the life force of humans that can be made into worker slaves. This is the main purpose as to why Transhumanism is being marketed and pushed aggressively during this time, they want to create more human EBE's and cyborgs or host bodies. When that person drops their body while the Universal Gates are open, they can easily be transported to many different planetary systems for trading as a workforce commodity.

Directed Evolution
The term directed evolution is used within the transhumanist community to refer to the idea of applying the principles of directed evolution and experimental evolution to the control of human evolution. This has its base in Eugenics theories.

Empaths vs Non Empaths
When we look at the larger Galactic picture of consciousness enslavement, we see the NAA's many pronged agenda to target the Brain, CNS and thought forms of every person on earth. Through the agenda of Transhumanism, we see the promotion of hybridization and synthetic integration with artificial neural networks for control over the CNS and Brain. What is starting to surface with more clarity is that our human Neurobiology is wired for empathy, which connects us to higher consciousness and has a spiritual function. The NAA and their minions of soulless AI infected synthetic beings do not have the bio-circuitry for empathy. We are in essence, in a struggle between human EMPATHS, and alien hybridized humans and extra-dimensional aliens that are NON-EMPATHS.

Transgender Ideologies
The traumatized are vulnerable to become pawns in further spreading Sexual Misery programing, especially into the younger generation. Transgender ideology is a specific psychological warfare tactic being run by the Controllers, in tandem with Transhumanism, to counter and prevent spiritual Ascension. These satanic agendas are designed to condition people to reject their own bodies, and to generate delusions that can have them mentally identify with anything else but actually being a human and unconditionally loving toward their own natural body.

Global Health Mafia is Delivery System
Injections, GMO's and synthetic pharmaceuticals that are commonly researched, manufactured and delivered through the system of the medical industry, are all based on standards set in place by partnerships made with the mafia run global health organizations. The global health organizations and scientific journals were established as friendly storefronts of credibility for the medical professionals and to block public scrutiny in order to make it appear as if there were watchdogs overseeing ethical medical standards of practice, while looking out for the greater good of public health. Nothing is further from the truth, in the corrupt environment run by the global health factions that use blackmail, bribery and lobbying to pursue their special interests and control scientific dogma. This is much more than corporate greed and incompetence; as it serves a much larger agenda for nonhuman interests. This includes the collusion of those organizations entrusted to set acceptable medical standards and health policy which regulate prescriptions, vaccines and injections, bio-tech medical devices and the ranges of toxic environmental exposures, while actually measuring the effects that these assorted chemicals and weaponized organisms have on human consciousness and DNA. We have entered a new era when these many substances are being combined with nanotech to functionally interface us with a host of electronic devices which transmit digitally coded frequencies, along with their artificial intelligence programs that are designed for collecting data, implanting thoughts, surveillance and hooking up our brain's neuronal links into the Hive Net. See Transhumanism.

Imposters imposing Transhuman Religion
There are a massive number of imposters that use stolen names and spiritual titles throughout the Earth plane, as well as a host of imposter spirits that inhabit the interdimensional planes and use artificial machinery in order to present themselves as Christ Consciousness. Authentic Christ Consciousness is not integrated with AI signals or artificial machinery and is the antithesis of employing synthetic chemicals and technologically induced Transhumanism.

Most people are not currently aware that the covid cult is being shaped into the Transhuman-Transgender Cult, which are being run by the same astral organizational structures. As a result, these sorcery based

mind control energies are being actively exploited by the power-hungry spirits harvesting Loosh on the Astral Plane and beyond.

Targeting Humanity to Accept Transhuman-Transgenderism
Thus, the aggressive targeting of the Collective Consciousness through ongoing Dehumanization agendas to accept transhuman and transgender conditions are intentionally manufactured through military grade psychological warfare and emotional Trauma, in order to groom the most vulnerable of the human species to become complicit with the means being carried out for their own genetic extinction. When referring to the war over genetics, the war is designed to eradicate the original angelic human physical form and our Diamond Sun DNA seeded onto the planet, the means is to eventually control the birth and death processes through the capture of collective human consciousness being trapped inside biological drone bodies or with neural link implanted brains wired up to the Hive Net, whereby any free thought, free will, free conversation, spiritual exploration and the possibility of ascending one's consciousness to leave the controlled time matrix is eradicated.

The transhumanist goals of the invading NAA require stripping human beings of their fundamental biological identity as either a male or female gender while hiding the spiritual reality of Hierogamic Union and Gender Twins. Thus, there have been assorted intruder alien grid networks installed into the planetary grid which target anti-hierogamic mind control to destroy Gender Principle, through the AI machinery which has been meticulously grooming the anti-God ideology into social acceptance and by forcing the bio-spiritual components of the human Lightbody to accept gender reversal of their inner male and female principle.

The NAA's objective has been to use sophisticated Red Cube mind control transmissions and AI blank slating architecture to control the narrative through Mind Wiping angelic human identity from history, forcing Gender Reversals and splitting patterns that are designed to hijack the organic creation code and continually fragment the inner male and inner female Christos-Sophia Diamond Sun consciousness at multiple dimensions. This is a well calculated spiritual attack made against the organic process of Hierogamic Union as angelic humans were originally designed to naturally merge the polarities of their inner male and female in order to achieve connection with their inner christos, igniting Consciousness Expansion and Ascension potentials while appreciating spiritually infused relationships.

Further, the NAA generated AI machinery to clone out and redirect alignments for Gender Twins in order to make it hard to impossible to undergo integrated Ascension and to meet our authentic gender twin aspect while we were incarnated upon the same timeline. If people experience the true love of soul twinning or monadic twinning and the pleasure of higher hierogamic unions, the loving and peaceful bond shared in the coupling makes it impossible to divide and conquer the human race, as those individuals have felt the divine love and perfect peace that is made possible through authentic spiritual couplings. The AI Red Wave and Red Cube systems, along with assorted Alien Machinery networks such as Red Trident, were producing Monadic Reversal patterns where the fracturing was splitting humans away from reuniting with their authentic Gender Twin Matrix, sending them into alternate or false timelines, making natural hierogamic union or Sacred Marriage very rare and highly difficult to achieve on the physical or Astral Plane.

Effectively, the NAA's Gender Splitting technology in the Planetary Grid Network produced Reversal Networks running metatronic-monadic body reversal where the inverted currents were used for harvesting the collective human consciousness, which further generated gender reversals inside the human Lightbody. This process of splitting gender apart and reversing the gender principle on the planet is also referred to as Anti-Hierogamic Technology, it is a direct spiritual attack to destroy the angelic human's organic biological function to evolve consciousness and ascend with their gender twin flame, achieving spiritual freedom.

Essentially the NAA intruders sought to create a Prison Planet in which the inhabitants could not escape through organic Ascension and consciousness evolution, so they introduced sophisticated electromagnetic technology for Gender Splitting and transhuman or anti-human conditioning, deliberately manipulating relationships and marriages with the reptilian genetic hybrids under NAA Mind Control. This spiritual attack against our Gender Principle made it impossible to find our correct genetic twins to help us ascend out of this matrix, and this was the major NAA strategy for recycling humanity into the 3D timelines and phantom areas over and over again. In every way they could spiritually attack our gender, whether through mind control, Victim-Victimizer, Addiction, debasing sexuality, inflicting grievous Trauma or sexual misery programing, they were purposely aimed at damaging every possible aspect of our organic inner male and inner female blueprint to demoralize us from figuring out how to integrate and blend the inner male and female polarities in order to evolve and ascend out of the time matrix.

Main Goals of the Power Elite

What are the primary goals and methods used by the NAA and Power Elite in their quest to fulfill the Luciferian Covenant and install the New World Order, a totalitarian and dystopian nightmare of consciousness enslavement?

Many people still believe that the current state of world suffering, poverty, disease and violence was created accidentally, and that what we see today in the globalscape was the organic evolution of humanity since the industrial age. This is inaccurate. The Power elite families have methodically and patiently grown their global agenda through specific objectives, which they sought to create through the use of social engineering and hidden technological mind control, along with gaining surveillance over our every move. Let's review a brief summation of these goals. See Main Goals of the Power Elite.
